WRITE. COLLABORATE. DOMINATE.

Built with Purpose

CyberDominance.com is on a mission: bridge the gap between technical know-how and corporate strategy. Both aspects are important, but too often they are treated separately with catastrophic results.

Dominance means that **you are in control of your fate** – despite an adversary hell-bent on hacking you. You can't achieve cyber dominance without technical know-how and innovators – and you can't do it without a coherent strategy that manages risk and resources, either.

You are the cure for these disjointed halves. Bring together aloof executives and scope-locked technicians by proving that synergy and collaboration – not policy stonewalling and technobabble – are the keys to achieving cyber dominance.

Built on Sound Philosophy

Cyber Dominance is built on the rock-solid concepts of *General Dominance Theory* – the implementation of Clausewitz's war theories that have influenced militaries worldwide for nearly two centuries. GDT put the final nail in the coffin: **cyberspace is a battlespace** like any other, and a millennia of warfare can help us understand and win.

Built for You

CyberDominance.com is the platform you have been waiting for. Whether you are a technical expert, a strategy buff, an integrator, or simply a person that thinks, you can be at the **forefront of the cyber enlightenment**.

As a contributor, *you write*. *We handle the rest*. Perks include:

- Full rights to your work at all times
- Professional attribution of your work
- Social media exposure - even for your other projects
- Full association with the CyberDominance brand
- High-quality editorial and formatting services
- Worry-free hosting of your work
- @CyberDominance.com email
- Tools for discussing your work with your readers
- Collaboration tools with other writers

Built. And Ready to Go.

No fees. No contracts. No commitments.

We need soldiers, plain and simple.
